journal of MEMBRANE SCIENCE

Contents

Editorial v

On current dependence of the electro-osmotic permeability in ion-exchange membranes
V.M. Barragán, C. Ruiz-Bauzá and J.I. Mengual (Madrid, Spain) 1
An approximate solution for countercurrent gas permeation separating multicomponent mixtures
H. Chen, G. Jiang and R. Xu (Dalian, China) 11
Selective membrane transport of Pb^{2+} ion by a cooperative carrier composed of 18-crown-6, tetrabutylammonium iodide and palmitic acid
H. Parham and M. Shamsipur (Shiraz, Iran) 21
Liquid expulsion permporometry for characterization of porous membranes
P. Schneider and P. Uchytil (Prague, Czech Republic) 29
Preparation of pervaporation membranes for removal of dissolved organics from water by plasma-graft filling polymerization
T. Yamaguchi, S. Yamahara, S. Nakao and S. Kimura (Tokyo, Japan) 39
Gas-transport properties of sulfonated polystyrenes
W.-J. Chen and C.R. Martin (Fort Collins, CO, USA) 51
High collection rate of Pd in hydrochloric acid medium using chelating microporous membrane
G.-Q. Li, S. Konishi, K. Saito (Tokyo, Japan) and T. Sugo (Takasaki, Japan) 63
Hydraulic permeability of protein deposits formed during microfiltration: effect of solution pH and ionic strength
S.P. Palecek and A.L. Zydney (Newark, DE, USA) 71
Use of alcohols as cosolvents in enzyme-facilitated transport of organic acids through a liquid membrane
D.G. Rethwisch, S. Parida, G. Yi and J.S. Dordick (Iowa City, IA, USA) 83

Short communication
Highly asymmetrical carbon membranes
V.M. Linkov, R.D. Sanderson and E.P. Jacobs (Stellenbosch, South Africa) 93

Meeting announcement 101
Meetings calendar 103

Review
Current hurdles to the success of high-temperature membrane reactors
G. Saracco (Torino, Italy), G.F. Versteeg and W.P.M. Van Swaaij (Enschede, Netherlands) 105

Effects of pH and ionic environment on the permeability and rejective properties of an alumina microfiltration membrane for whey proteins
M. Pouliot, Y. Pouliot (Québec, Canada), M. Britten (St-Hyacinthe, Canada) and N. Ross (Québec, Canada) 125
Structure and gas permeability of alkynylated poly(phenylene oxide)
R. Sisto (Rome, Italy), C. Bonfanti and C. Valentini (Milan, Italy) 135
Sorption, transport, and history effects in phenolphthalein-based polysulfone
A.Y. Houde, S.S. Kulkarni and M.G. Kulkarni (Pune, India) 147

1994 Elsevier Science B.V.

SSDI 0376-7388

Pervaporation of organic liquid mixtures through membranes of polyimides containing methyl-substituted phenylenediamine moieties
N. Tanihara, K. Tanaka, H. Kita and K. Okamoto (Yamaguchi, Japan) 161
Separation of CO_2 with $BaTiO_3$ membrane prepared by the sol–gel method
K. Kusakabe, K. Ichiki and S. Morooka (Fukuoka, Japan) 171
Linear approximations for the description of solute flux through permselective membranes
J. Waniewski (Warsaw, Poland) 179
Parameters influencing the rejection properties of FT30 membranes
P. Lipp (Karlsruhe, Germany), R. Gimbel (Duisburg, Germany) and F.H. Frimmel (Karlsruhe, Germany) 185

Rapid communication
Chitosan modified sulfonated poly(ethersulfone) as a support for affinity separations
E. Klein, E. Eichholz, F. Theimer and D. Yeager (Louisville, KY, USA) 199

Meetings calendar 205

Anomalous sorption and pervaporation of aqueous organic mixtures by poly(vinyl acetal) membranes
E. Ruckenstein and F. Sun (Buffalo, NY, USA) 207
Separation of ethanol/water mixture by silicalite membrane on pervaporation
T. Sano (Ishikawa, Japan), H. Yanagishita, Y. Kiyozumi, F. Mizukami and K. Haraya (Ibaraki, Japan) 221
Shear-induced particle diffusivity during crossflow microfiltration of *Saccharomyces cerevisiae* in a radial flow filtration chamber
I. Bashir, M. Jerabek, T. Martin and M. Reuss (Stuttgart, Germany) 229
Simulation of cross-flow filtration for baffled tubular channels and pulsatile flow
Y. Wang, J.A. Howell, R.W. Field and D. Wu (Bath, UK) 243
A diffusion-controlled procedure to close pores in ceramic membranes
M. Trocha and W.J. Koros (Austin, TX, USA) 259
Ultrafiltration model for partial solute rejection in the limiting flux region
O.F. Von Meien and R. Nobrega (Rio de Janeiro, Brasil) 277
Surface characterization of ceramic membranes by atomic force microscopy
A. Bottino, G. Capannelli, A. Grosso, O. Monticelli, O. Cavalleri, R. Rolandi (Genova, Italy) and R. Soria (Bazet, France) 289
